

Most Decorated Printer at the 2005 Sappi Awards

Offset Alpine Printing was very successful recently at the 2005 global Sappi Awards for excellence in print, emerging from the competition as the most decorated printer in Australasia.

Offset Alpine received a silver medal for their production of *FHM Collections* and a bronze award for their self promotion brochure entitled Performance. In previous years, Offset Alpine has received gold medals, but alas there were no gold medals awarded in Australasia this year.

As manufacturer of the coated fine paper upon which some of the best printers

around the world demonstrate their skill, Sappi believes that these highly talented and dedicated craftsmen deserve more than mere admiration for their superb work. That is why, in 1979, the annual Sappi Printer of the Year awards were established, with the purpose of recognising and rewarding excellence in print.

Since inception, the Sappi Printer of the Year Awards has grown in both size and stature. Judged by respected independent print experts nominated by national print federations; the competition

awards bronze, silver and gold awards to printers that have proven their expertise in their region.
