

Perfect measurement and print quality in daily practice at Craft Printing with the new KBA Rapida 105

The new Stahlfolder provides greater flexibility for meeting the challenges of the market and constantly changing requirements.

Craft Printing - Entering the Future of Printing and Folding Today

ANNOUNCING: The New Generation of Printing Equipment at Craft Printing now includes the KBA Rapida 105 and the Stahlfolder TH/KH.

Craft Printing now have the ability to produce print jobs faster, more efficiently and more beautifully than ever before.

Clients can achieve brilliant, true to life colour with Craft's new 12 colour press - the KBA Rapida 105.

Rainbow printing with the finest gradations is brought to perfection on this intelligent press, designed to provide perfect measurement and perfect print quality control – not to mention a whole range of colours that you never dreamed existed.

And for those who are seeking sophisticated coating to make their print stand out from the crowd the new KBA Rapida offers a multitude of options that are sure to excite.

But that's not all. There's more good news. Craft Printing is also advancing the frontiers of finishing technology with their new Stahlfolder.

The new standard in folding machines, the automation and optimised operation of the Stahlfolder TH/KH now actually enables Craft to add even more value to their clients' print jobs more quickly.

This investment truly cements Craft Printing as the origami experts, offering new dimensions in innovative solutions for top quality folds.

Craft Printing offers all of this forward-looking technology in combination with the age-old craft of printing and good old-fashioned service.
